

## ***Exercise 5 A***

### ***The Setup***

Create a copy of your solution to lab 4 and call it exercise8.5. Remember to also change the project name inside the pom.xml's `<artifactId>` and `<name>` tags.

### ***The Application***

This is not going to modify the logic of your application

### ***The Exercise***

Include a welcome page with internationalization. The page has to include support for English and any other language that you would like to add. These are at least some of the words you must include in your welcome page:

Welcome

Please select one

Cars

Books

## *Exercise 5 B*

### *The Setup*

Use the application from 5 A

### *The Application*

Add Spring security to the application and handle different roles of users

### *The Exercise*

Add three types of users: ADMIN, SALES, and ACCOUNTANT

Everyone should have access to your welcome page.

SALES only should access the cars area

ACCOUNT should access only the books area

ADMIN have access to everything

You don't need to use a database for this exercise, and you can use the default login screen three types of users: ADMIN, SALES, and ACCOUNTANT

.

### OPTIONAL

- a) Use a database to store the users
- b) Create your own login page
